

The advertisement features a central photograph of a teal-colored electric roller garage door with horizontal ridges. The door is set within a white frame on a brick wall. Above the door is a dark blue fascia and a roof with grey tiles. A black downspout is visible on the right. The image is framed by large red triangular shapes on the left and right sides. A red circular sticker is in the top left, and text is in the bottom right. The bottom of the ad has a white background with large red and black text.

PAGES 16 - 18

Effortless Technology

Using your ArmourDor is always easy and effortless.

THE IDEAL INSULATED ROLLER GARAGE DOOR!

ArmourDor has been designed to be the ideal garage door.

Remote control puts you effortlessly in control and is integral to every door.

ArmourDor technology means:

- Operating your door is safe, reliable and remote controlled as standard.
- Operating your door is simplicity itself!
- Built in safety system within the rubber seal with contact touch activation.

Every door is made to order and CE marked, confirming it is tested as safe to all current legislation. Each door is backed by fair warranties for peace-of-mind (for details see back page).

ArmourDor - Smart, Secure, and exceptionally good looking too...

YOUR GARAGE - PART OF YOUR HOME AGAIN!

Replacing a traditional garage door with an ArmourDor Electric Roller Garage Door will make such a difference to how you think about your using your garage space.

Remote control as standard, with two handy keyfob transmitters.

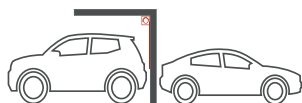

Plus a free Comet Garage Doors keychain with every order!

INTELLIGENT DESIGN

It's hard to imagine a more convenient, practical and easy to use garage door...

MAKE SPACE INSIDE YOUR GARAGE

ArmourDor opens vertically and rolls around a barrel inside a very compact housing at the top of the door.

This means you are free to use the overhead space in your garage for storage space clear of any obstructions. The housing box into which the door rolls is typically just 300mm deep. From the inside, ArmourDor is neat, uncluttered and easy to keep clean.

THE SPACE CREATOR!

Out-swinging doors that knock shins and scrape cars, clunky overhead tracks and springs taking up storage space, noisy motors obstructing lights and untidy timber frames that narrow your garage opening...

...our ArmourDor changes everything.

MAKE THE BEST USE OF YOUR DRIVEWAY

Opening vertically allows you to park as close as you like on your drive and inside the garage.

No out-swing or curving around overhead tracks as ArmourDor opens, keeps things simple. No more trying to judge how much space to leave to allow the door to open - trust your parking sensors!

MORE ROOM MAKES PARKING EASIER

ArmourDor is typically fitted behind the garage opening, increasing drive-through room.

With no need for a timber sub-frame, you can gain valuable extra drive-through width and height. Making it perfect for 4x4s and today's wider vehicles.

KEEPS OUT THE WEATHER

Draughty and leaf blown garage? ArmourDor brings your garage back in from the cold.

Garage under a bedroom?

The flexible rubber bottom seal.

Stop those draughts

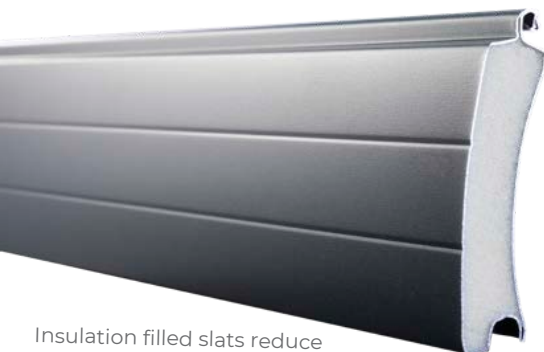

Designed to keep the weather outside.

A traditional garage door often lets in cold air through gaps around the frame, leaving your garage chilly and uncomfortable. ArmourDor solves this problem with smart, built-in features designed for warmth, comfort, and efficiency.

ArmourDor includes draught-reducing brushes inside the guide frame, which not only help block cold air but also ensure the door operates smoothly and quietly. A rubber threshold seal adds another layer of protection, preventing draughts from entering at floor level.

Combined with an insulation-filled door curtain, these features significantly reduce heat loss—bringing your garage “in from the cold.” This makes ArmourDor an excellent choice for homes where the garage sits beneath a bedroom, helping keep the entire space warmer and more comfortable.

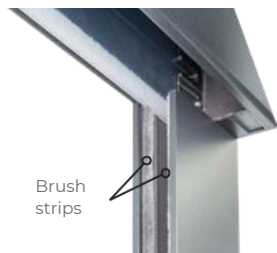

Less draught, less noise, more comfort—
ArmourDor delivers it all.

Insulation filled slats reduce heat and sound transmission.

Brush strips and nylon loop strips help keep draughts at bay at the top and sides of the door.

Brush strips

THE DRAUGHT ELIMINATOR!

An extra room?

What would you like to do with your garage?

Home gym, workshop, studio?

Keeping things temperate is much easier with ArmourDor!

WORRIED ABOUT NEW TECH? **DON'T BE!**

We know that switching to an electric garage door can feel like a big change – but don't worry, we've got you covered.

KEEPING YOU IN COMPLETE **CONTROL**

Every ArmourDor electric roller garage door comes with:

- Easy-to-follow guide for using your remote handsets.
- Clear demonstration of your new door's features, given by the engineers who installed it.
- And most importantly – a team that's always just a call or message away!

At Comet Garage Doors, we don't just fit your door and disappear – we're committed to making sure you're confident and comfortable using it, long after we've packed up our tools.

With more than 40 years of industry experience, Comet Garage Doors delivers expert installations you can trust. Enjoy complete peace of mind knowing your new door is in the hands of true professionals.

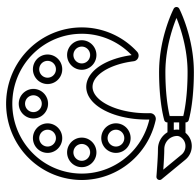

AFTER:

Going electric is easier than you think!

If you already have a power socket in your garage, switching is quick and hassle-free.

- No major wiring work.
- Simple, clean installation.
- And the ease of remote-controlled convenience.

Ready to upgrade?

SO COLOURFUL!

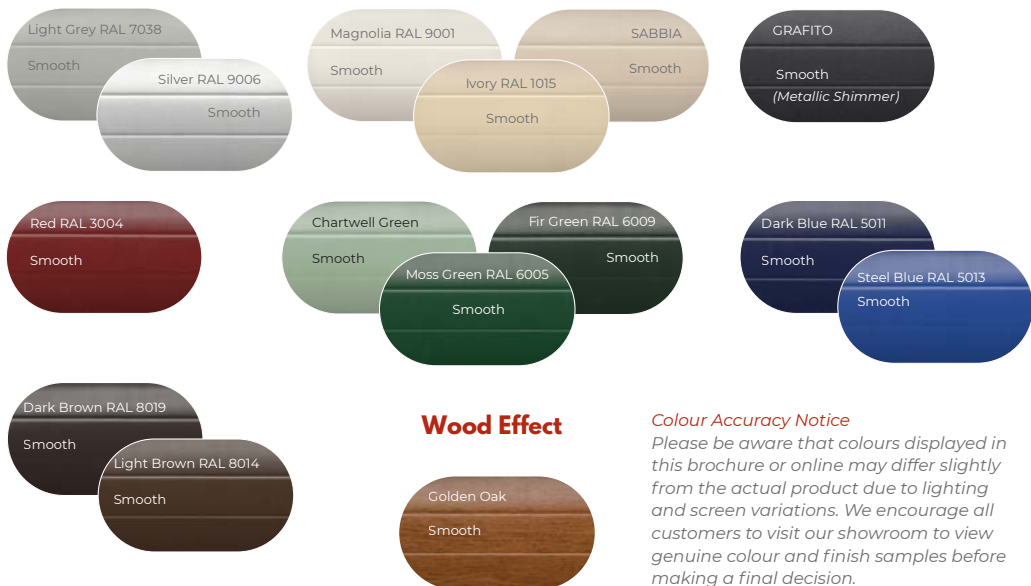

A spectrum of colours and finishes to suit every taste and style of home...

Standard Colours

At Comet Garage Doors, we believe great design should come as standard. That's why our three most popular colours — White, Black, and Anthracite Grey — are included at no extra cost with every ArmourDor garage door.

Premium Colours

Wood Effect

Colour Accuracy Notice

Please be aware that colours displayed in this brochure or online may differ slightly from the actual product due to lighting and screen variations. We encourage all customers to visit our showroom to view genuine colour and finish samples before making a final decision.

For homeowners looking to make a bold statement, we also offer a stunning range of Premium Colours, as well as our beautifully detailed Wood Effect finish. These optional upgrades allow you to match your door to your home's style perfectly.

Please note: Premium Colours and Wood Effect finishes carry an additional 10% charge on the total quoted price.

ArmourDor finished in Anthracite Grey smooth with colour-matched guides and box.

The door box

Smooth finish Golden Oak is also available with coordinated box and guides.

The inside face of the door curtain

The door guides

A FULL BOX AS STANDARD

& options to coordinate finishes across all parts of the door...

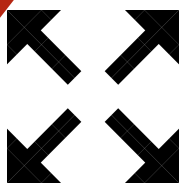

How do I look?

ArmourDor comes with a full door box as standard, not a costly extra...

A full door box makes everything neat and tidy. It's practical too, as it prevents dust and other debris dropping onto the door mechanism, extending the life of the door. By enclosing the doors roll it also adds extra safety, reducing the possibility of entrapment.

The outer face of the door curtain

WHY SIZE MATTERS

How larger 77mm laths deliver superior strength, smoother operation, and greater durability.

When it comes to roller garage doors, not all laths (slats) are equal — and the difference between 55 mm and 77 mm profiles is more than just about looks. Here's why opting for ArmourDor's 77 mm laths delivers real-world advantages.

Better Insulation

Each 77mm lath is filled with high-density insulation, helping to reduce heat loss and unwanted draughts. This makes your garage more comfortable year-round and improves overall energy efficiency compared to thinner 55mm lath systems.

Built for Strength & Durability

The larger 77mm profile provides far greater structural strength than 55mm laths. This improves the door's resistance to bending, twisting or flexing, giving you a sturdier, more secure roller door that stands up to daily use and harsh weather conditions.

Smoother, Quieter Operation

Because 77mm laths are stronger and more stable, they roll up and down more smoothly, with less movement and reduced risk of rattling. The result is a quieter, more refined operation — especially noticeable in windy conditions.

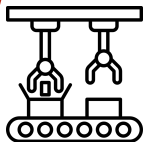

Enhanced Security

A stronger lath profile means a stronger curtain. With 77mm ArmourDor laths, the door is more resistant to forced entry and deformation, offering a higher level of protection for your home and belongings. To help customers understand the difference, we can show — in our showroom — a demonstration video of a 55mm roller door being forced open in under 20 seconds, highlighting exactly why a stronger lath profile matters.

In Summary

Choosing ArmourDor with its 77mm laths means choosing enhanced strength, superior security, quieter performance, better insulation, and long-lasting reliability. It's the premium option — and the reason ArmourDor stands above standard roller doors built with smaller 55mm laths.

FROM OUR FACTORY TO YOUR HOME

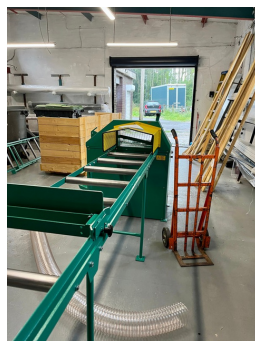

The ArmourDor Advantage.

We make every ArmourDor ourselves at our Byermoor factory. As a small, family-run business, keeping our manufacturing local allows us to stay hands-on with every stage of the process, ensuring each door is made with care, consistency, and attention to detail.

Made Locally, Made Carefully

Our team works directly with the materials, tools, and machinery that go into each door. This allows us to take a practical, quality-first approach.

- Thoughtfully selected materials for long-lasting use
- Careful fabrication to ensure a reliable fit
- Checks at each stage to make sure everything is working as it should
- A simple, honest focus on building something that lasts

Why Making Our Doors Ourselves Matters

Shorter Lead Times

Because we manufacture ArmourDors in-house, we aren't waiting on external suppliers or overseas shipping. This helps us keep lead times reasonable and means customers aren't left waiting longer than necessary.

Flexibility When You Need It

Producing our doors ourselves gives us room to adapt. Whether it's a particular size, colour, or small adjustment, we can usually accommodate things more easily than companies that buy doors in pre-made.

Consistent Quality

With everything made under one roof, we know exactly how each door has been built. Our team sees the product from start to finish, and we make sure every ArmourDor is checked before it leaves our factory.

A Local Business That Stays Local

Manufacturing in Byermoor allows us to support local jobs and stay true to the roots of our family business. When you choose an ArmourDor, you're choosing a product made by a small, committed team who take pride in their work.

YOUR SURVEY, MADE SIMPLE

Clear advice, expert measurements, and a quote you can trust.

Choosing a new garage door shouldn't be complicated — and with Comet Garage Doors, it isn't.

Our survey visit is relaxed, informative, and designed to give you complete confidence before placing an order.

Here's exactly what happens when our surveyor comes to your home:

A Friendly Face, Not a Sales Pitch

Our surveyors are skilled engineers — not commission-based salespeople.

There's no pressure, no upselling, and no rushed decisions. Just honest advice from someone who understands garages inside and out.

See and Feel the Quality

To help you visualise your new garage door, our surveyor brings:

- Colour samples
- Lath profiles
- Box and guide finishes

You can compare finishes on your driveway, against your brickwork, or in the garage — making the choice simple.

Your Door, Your Decision

There's absolutely **no obligation** to proceed.

We give you all the information you need, then leave the decision entirely in your hands. Whether you order right away or take your time, we're here when you're ready.

From Survey to Installation

When you choose to go ahead:

1. Your door is built in-house at our factory.
2. A fitting date is arranged to suit you.
3. Our engineers install your new ArmourDor, demonstrate its features, and tidy up thoroughly.
4. You enjoy a warmer, safer, smarter garage space.

Simple. Friendly. Accurate. No pressure.

That's how surveys should be!

site survey today!

WHERE WILL MY DOOR BE INSTALLED?

Behind

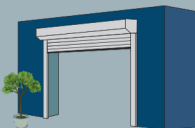

Behind the garage opening is the ideal place to for your door to be fitted. It's neat and tidy, keeping everything inside your garage and gives you maximum drive through space.

Between

For openings with limited space on the inside, fitting your door between garage opening still allows for a neatly tucked away door, but you will lose some drive through space.

In Front

ArmourDor can be fitted to the outside of the opening when the space inside the garage and the garage opening does not allow. The door box will be visible and the reverse face of the door will face outwards (Not suitable for textured doors).

During your survey, our expert will evaluate your space and advise on the most suitable ArmourDor installation option for optimal performance.

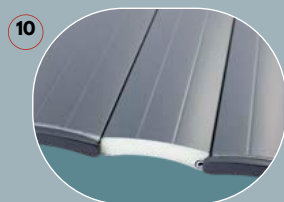

IN DETAIL

The sum of the parts...
ArmourDor is designed for lasting quality.

Weather protection

Insulated doors slats reduce the transmission of sound and heat. Brushes in the guides and the bottom rubber compression seal help keep draughts and the weather outside.

WHAT MAKES ARMOURDOR GREAT...

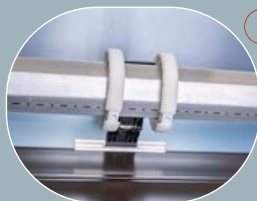

Safe

The intelligent safety edge senses obstructions, stopping and reversing the door on contact.

Intelligent Control

The door's brain - a courtesy light guides your way, push buttons allow door operation and the control unit powers and monitors the motor and safety systems.

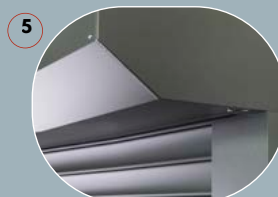

Secure & Quiet

Auto-locks (ArmourDor shown) hold the door securely closed and felt on the locking rings keeps the door operating quietly.

Full Box As Standard

Protecting the mechanism from dirt, keeping the door safe and looking very neat and tidy!

Matching guides & Box Option

Most solid colours and many wood effect doors are available with a complimenting finish as an option - see pages 11-12.

Safety Brake

ArmourDors over 20Kg feature a safety brake that stops the door dropping if the motor or motor brake fails.

Override for Power Failure

If the power fails, a hand crank is supplied with all doors to wind the door open.

Concealed Motor

The powerful motor is fast and quiet and concealed inside the barrel of the door.
